

Don't be stuck in a stinky
situation with nowhere
to go...

SEPTI-
Clean

It's time to clean up your act.

SEPTI-CLEANZ™ COMES TO THE RESCUE!

A clogged septic system means smelly odors, toilet problems, slow drainage, and the need for frequent pumping. It also means personal inconvenience and maybe even costly repairs. It's an embarrassing situation.

Put an end to all these problems

Only Septi-Cleanz™ is biologically active and can restore clogged systems in no time!

with a revolutionary new treatment process called Septi-Cleanz™.

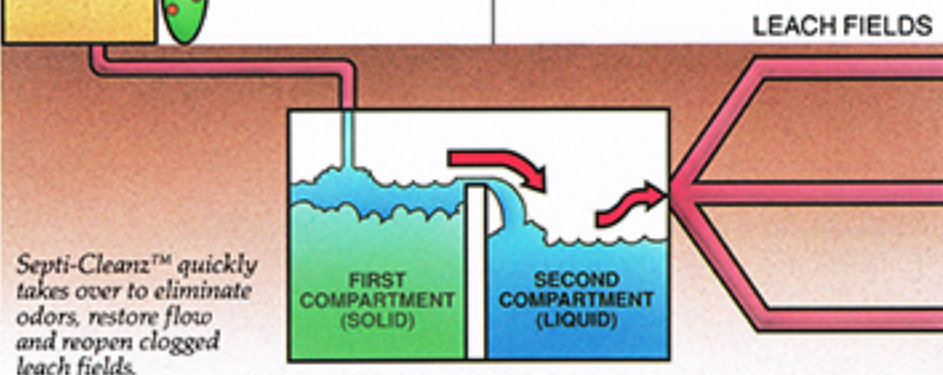

Using the Septi-Cleanz™ method is easy and remarkably thorough—not to mention the most cost effective of all septic tank cleaning products in today's stores and mail order catalogs.

Other products only try to enhance the breaking down of build-up inside septic tanks. But these are inactive and ineffective in restoring a clogged system. And pumping just eliminates part of the problem.

SEPTI-CLEANZ™ IS BETTER THAN PUMPING.

Septi-Cleanz™ is different. Only Septi-Cleanz™ is biologically active and can restore clogged systems in no time. Most of all, Septi-Cleanz™ does more than simple pumping can do. Here's how...

Your septic tank empties into leach fields or lines. Over time, leach fields and lines will become clogged, because mere pumping of the tank provides only temporary relief of the tank itself—but

not the leach lines.

SEPTI-CLEANZ™ CLEANS.

This biologically active material quickly takes over to eliminate odors, restore flow, and reopen clogged leach fields and lines by eliminating the build-up that caused the clogged condition. And there's no need to dig up your landscaping.

Replacing your leach field costs an average of \$15-20,000 and it will take a week with a backhoe. Septi-Cleanz™ will fully restore flow through the tank and, most importantly, your leach field in only 4-6 weeks. Best of all, it

costs less than \$50 per treatment!

SEPTI-CLEANZ™ IS RESPECTED.

Known and respected by private industries, Septi-Cleanz™ products have proven successful for Teledyne National, The Indian Council of Agricultural Research, and the Food and Agriculture Organization of the United Nations. The Septi-Cleanz™ treatment comes with the only money back guarantee of its kind.

SEPTI-CLEANZ™ IS SAFE.

Developed and tested successfully

for many years, Septi-Cleanz™ has been granted EPA approval as environmentally safe. And Septi-Cleanz™ is non-toxic and safe to pets, people, plants and ground water.

Septi-Cleanz™ is environmentally safe.

Septi-Cleanz™ is now the environmentally preferred septic tank maintenance method.

SEPTI-CLEANZ™ IS GUARANTEED.

When our simple directions are followed, we guarantee you will get a restored, full flow system

GUARANTEE

Only Septi-Cleanz™ comes with a written guarantee!

in 6 weeks or less, with no need for any pumping for at least 6 months! One treatment lasts at least 6 months! It's clean, neat and fast. And best of all, it works! In fact, it's so effective, only Septi-Cleanz™ comes with a written guarantee, for your money back.

So, don't suffer any longer! It's time to come clean with Septi-Cleanz™.

Satisfied Homeowners

Mr. A.M., Mead Valley, CA:

"Our 36 year old system was requiring pumping every 2 weeks. After our Septi-Cleanz™ treatment, our leach lines are flowing beautifully, and we haven't pumped since."

Mr. E.L., Perris, CA:

"We had very poor drainage, and a terrible odor problem. The Septi-Cleanz™ service was fantastic."

Anna P., Littleton, CO:

"Our system was new in 1963! Our flow was so bad we were pumping weekly and used as little water as possible. Our best quote for a new field was \$18K! One application of Septi-Cleanz™ fully restored our system in only 6 weeks and no more pumping!"
